Reveals the Real Truth about the Safety
of Genetically Engineered Foods

Thursday, November 30, 7:00 pm

North Underground
Lecture Hall
University of Montana

Jeffrey M. Smith will reveal the significant health dangers of genetically modified (GM) foods and the intense industry influence and political corruption that allow them on the market.

Hailed as the best book on the topic, many believe that the revelations in this book can topple an industry.

"Outrageous! That's what you'll say over and over again when you read how the biotechnology companies have manipulated the government, our food, and the media, and put an entire generation at risk."
- Ben Cohen (of Ben and Jerry's)
